DETAILED ACTION

Response to Amendment

1. Amended Claims 1-3 and 5-6 have been noted.
2. Cancelled Claims 7-12 have been noted.
3. New Claims 13-14 have been noted.
4. Claims 1-6 and 13-14 are Restricted.

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 14 are drawn to a control device for controlling an electronic device, classified in class 711, subclass 102.
 - II. Claim 13 is drawn to an automatic document feeder, classified in class 399, subclass 367.
6. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention II could utilize a control device that is not necessarily Invention I. The subcombination has separate utility such as controlling a computer.

Because these inventions are distinct for the reasons given above, and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
